3) Our business is substantially dependent on limited number of customers for a significant portion of our revenues. The loss of any significant clients or an adverse change in the customer relationship may have a material and adverse effect on our business and results of operations.

The Company is largely dependent on single and few customers, as the top one and top ten customers constitutes around 17.95% and 76.65% of the total income for the year 2014-15 on a standalone and consolidated basis. While we are constantly working to increase our customer base so as to enable us to reduce dependence limited number of customers, there is no assurance that we will be able to broaden our customer base in a particular time frame in future. Our business or results of operations could be adversely affected by a reduction in demand or change in preference for our product or cessation of our relationship with any such major customers.

4) The total revenue of the company is decreasing year on year since fiscal year 2013 and in spite of all its efforts, the company is unable to change the trend.

The metal sector is facing severe economic slowdown due to multiple factors most of which are not within the control of management and same is affecting the scale of operations and performance of the company due to which the profitability of the company has become almost stagnant during last 3 years. However, the manufacturing activity of the company is doing relatively better and company expects that it will help in maintaining and improving the future profitability in the future.

5) The Company has unsecured debt that is repayable on demand.

The Company has availed of certain unsecured loans that are repayable on demand. As on September 30, 2015, the amount of outstanding unsecured loans availed by the company which are repayable on demand is Rs. 487.50 Lacs. The unsecured loan taken by the Company is not from any Bank or Financial Institution. In the event that the lenders of such loans demands the repayment of these loans, the company would need to find alternative sources of financing, which may not be available on commercially reasonable terms or at all.

6) Investment made in Subsidiary Company as well as in the Chemical business has not worked out well as envisaged by the company.

Company invested almost Rs.3 crores in plant and machineries for the manufacturing unit of chemical products which it had acquired on rent during 2014-15. However, the said venture could not succeed and company had to shut down its operations in June 2015. In addition, the seller of the unit has forcefully taken the possession of the property as well as our machineries and stock (approximately worth Rs.9 lacs) lying in that premises. Mr. Jayeshkumar A Mehta, Director of the Company lodged a Police complaint in the Khambhat Police Station against Mr. Ritesh Kumar Patel along with few other person regarding the same. At present the matter is in dispute and company is in process to solve the matter amicably. Though the company is trying to resolve the issue through negotiations, if company is unable to get the possession of the said machineries and stock, it will have to write off the entire amount which will affect the profitability and financial position of the company to that extent which is substantial looking to the existing size of the company.

In addition, Company invested Rs.5 lacs in acquiring subsidiary company Sagardeep Engineers Private Limited ("SEPL") from its existing promoters and thereafter Rs.511.20 lacs for subscribing the share capital of this subsidiary company with no benefit accruing or expected to accrue to the company. There is neither any sizeable business in the subsidiary company nor any potential business prospect in the company which can commercially justify the amount of investment in SEPL.

7) Our Subsidiary has incurred loss in financial year 2014-15.

Our Subsidiary has incurred loss of Rs. 0.03 Lacs in financial year 2014-15. Sustained financial losses by our Subsidiary may not be perceived positively by external parties such as customers, bankers, suppliers etc, which may affect our credibility and business operations. There can be no assurance that our Subsidiary or any other ventures promoted by our Promoters, will not incur losses in any future periods, or that there will not be an adverse effect on our reputation or business as a result of such losses.

8) Other ventures promoted by our promoters are engaged in a similar line of business and conflict of interest cannot be ruled out which may have adverse effect on our operations and financial conditions.

Subsidiary Company, Sagardeep Engineering Pvt Ltd, and Proprietorship concern, Sagar Prakash Alloys are involved in the similar activities which is also one of the activities carried on by the issuer company.

This could lead to a potential conflict of interest for us and could adversely affect our results of operations and financial condition. There is no assurance that in case of conflict, our Promoters will not favour our group Companies owing to their common interest in both the Companies. In addition, attention to the other Group entities may distract or dilute management attention from our

business, which could adversely affect our results of operations and financial condition. For further information, see the section entitled “Our Promoters and Promoter Group” on page 104 of this Draft Prospectus.

- 9) **Our management will have flexibility in applying the Proceeds of the Issue and the deployment of the Proceeds is not subject to any monitoring by any independent agency. The purposes for which the Proceeds of the Issue are to be utilized are based on management estimates and have not been appraised by any banks or financial institutions.**

We intend to use the Proceeds of the Issue for the purposes described in “Objects of the Issue” on page 52. Our management may revise estimated costs, fund requirements and deployment schedule owing to factors relating to our business and operations and external factors which may not be within the control of our management.

The utilization of the Proceeds of the Issue and other financings will be monitored only by the Audit Committee of the Board and is not subject to any monitoring by any independent agency. Further, pending utilization of the Proceeds of the Issue, we intend to deposit the Net Proceeds only in scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1934.

Our funding requirements and the deployment of the Proceeds of the Issue are based on management estimates and have not been appraised by any banks or financial institutions. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change.

- 10) **We have experienced negative cash flows in prior periods. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial condition.**

The details of the negative cash flows of the Company are as follows:

- 11) **There have been instances of delay in compliances, filing of various forms, as well as non-compliances under various provisions of applicable Companies Act for which penal action can be taken against the company and its officers which would adversely affect financial position of the Company to that extent.**

Some of the instances of non compliances/delay in compliances of the provisions of the companies act are as under for which penal action can be taken against the company and its officers which would adversely affect financial position of the Company to that extent:

The Company has not complied with the provisions of Section 383A of the Companies Act, 1956 during the period March 22, 2012 to March 31, 2014 and the provisions of Section 203 of the Companies Act, 2013 during the period April 1, 2014 to March 31, 2015 as the Company had not appointed any Company Secretary during the said period. No show cause notice in respect of the above has been received by the Company from the office of Registrar of the Companies till date.

The company had passed a special resolution under section 149 and other applicable provisions of Companies Act, 1956 in its Extra Ordinary General Meeting held on March 6, 2014 relating to commencement of chemical business i.e. an object mentioned in the "other Object" clause of the Memorandum of Association of the Company. As per Section 117 of companies act, 2013, E-form is required to be filed within the stipulated period of passing the resolution but the company could not file E-form MGT-14 in prescribed time. Therefore, the Company filed an application to Central Government under section 460 of Companies Act, 2013 for condonation of delay in filing Form MGT-14 due to non filing of Special Resolution within stipulated time period. The said application has been made by the Company to Central Government by way of e-form i.e. Form NO. CG-1 on December 22, 2015 which is still pending. In addition, the company has also not filed a declaration in prescribed form as required under section 149(2A) with the RoC.

Company has given loan to its wholly owned subsidiary Sagardeep Engineers Private Limited which as on March 31, 2015 and September 30, 2015 stands at Rs.510.20 lacs and Rs.20.65 lacs respectively. The said loans given to subsidiary were "interest free loan" which prima facie is in non compliance of section 186 of the Companies Act, 2013.

12) Our Company has not filed certain Annual Returns appropriately in the past with respect to shareholding records.

Our Company has not filed certain Annual Returns for the financial year 2008-09, 2009-10, 2010-11 and 2011-12 appropriately with respect to shareholding records. Though our Company has appropriately maintained our Register of Members, Transfer Deeds and issued share certificates appropriately, inappropriate disclosures, as aforesaid, may in the future render us liable to statutory penalties.

13) Our indebtedness and the conditions and restrictions imposed by our financing and other agreements could adversely affect our ability to conduct our business and operations.

We have incurred a substantial amount of indebtedness which could adversely affect our financial condition. As on September 30, 2015, our short term and long term borrowings are Rs. 1900.14 Lacs on a standalone and consolidated basis. In addition, we may incur substantial additional indebtedness in the future. Our indebtedness could have several significant consequences including but not limited to the reduction of the availability of our cash flow to fund working capital, capital expenditures and other general corporate requirements. Also fluctuations in market interest rates may affect the cost of our borrowings.

Apart from that as per the terms of the sanction letter of the bank, the company can not do the certain activities, during the Currency of the bank's credit facilities, without the bank's prior permission in writing of the Banks, which amongst other, includes:

- h) Pay commission / brokerage / fees etc to Guarantor / or any other person for guaranteeing the facilities sanctioned to the Company;
- i) Declare dividends for any year except out of profits related to that year after paying all dues and making provisions as required for that year, provided there is no default in repayment obligations by the Company;
- j) Allow the level of net working capital to come down from the estimated/projected level.

We have made an application for the Bank for issuing the non objection certificate as the capital structure will be changed after the proposed IPO but the same has not been given by the bank as on date.

14) We have high working capital requirements. In case there is insufficient cash flow to meet our requirement of working capital or pay our debts, there may be adverse effect on the results of our operations.

Our business requires a substantial amount of working capital. We require working capital to finance the purchase of materials before payment is received from our customers. Our working capital requirements may increase if, payment terms include reduced or no advance payments or payment schedules that specify payment less favourable to us. Moreover, if a client defaults in making its payment to which we have devoted resources, it could also affect our profitability and liquidity and decrease the capital resources that are otherwise available for other uses. There can be no assurance that the payments will be remitted by our customers to us on a timely basis. Nature of our business forces us to accord higher credits to our customers resulting in high level of outstanding receivables. Continued increases in working capital requirements and insufficient cash flows from our operations to meet any of the above requirements may have an adverse effect on our financial condition and results of operations. Moreover, we may need to incur additional indebtedness in the future to satisfy our working capital needs.

15) We have made an application for registration of trademark for our logo

“  ” which is still pending with relevant trademark authorities as a result of which we may have lesser recourse to initiate legal proceedings to protect our brand. This may lead to dilution in the brand value in respect of our products in which we may deal in future.

We operate in an extremely competitive environment, where generating brand recognition is significant element of our business strategy. However we have made an application for registration of trademark for our logo which is still pending with relevant certifying authority and therefore we would not enjoy the statutory protections accorded to a registered trademark and our ability to use our logo may be impaired. For further details please refer to section titled “Government Approvals/Licensing Arrangements” beginning on page 184 of this Draft Prospectus.

16) The Company has not paid any dividend on equity shares and may not pay dividend in future also.

The Company has not paid any dividend on the Equity Shares in the past. Whether our Company pays dividends in the future and the amount of any such dividends, if declared, will depend upon a number of factors, including our results of operations and financial condition, capital requirements, contractual restrictions (including the terms of some of our financing arrangements that restrict our ability to pay dividends) and other factors considered relevant by our Board of Directors and shareholders. There is no assurance that our Company will declare and pay, or have the ability to declare and pay, any dividends on Equity Shares at any point in the future.

- 17) We do not currently have long term contracts or exclusive supply arrangements with any of our vendors, though we are dependent on a few suppliers. Any major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition.**

The major raw materials which are used by the company are Copper scrap and Cathode. The raw material consumption cost is 42.90% of the total Expenditure of the Company for the financial year 2014-15 on a standalone/consolidated basis. Our Company is dependent on a few suppliers for raw materials and we do not currently have long term contracts or exclusive supply arrangements with any of our vendors. Further, we are dependent on adequate and timely deliveries of necessary raw materials or equipment. In the event of a delay, inadequacy or default in deliveries by any of our vendors, we may not be able to obtain substitutes on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition.

- 18) There is risk associated with price fluctuation of raw material and finished product.**

In the past, there have been fluctuations in the prices of critical raw materials. Such fluctuations in prices of raw material and the Company's inability to negotiate at optimum market rates may affect its profitability. Similarly, the prices of finished products have also shown price variations, which may impact its profitability.

- 19) The object of the issue is funded mainly from the proceeds of present public issue. Due to the delay in the public issue, if any, there may be a delay in the schedule of implementation of the project that the company proposes to undertake.**

The object of the issue is to be funded mainly from the IPO. Due to the delay in the public issue, there may be a delay in the schedule of implementation of objects of the issue that the company proposes to undertake. Failure to complete the proceeds of the issue according to its schedule, may give rise to potential liabilities, as a result our returns on investments may be lower than originally expected, which may have a material adverse impact on the business operations and profitability of our Company.

- 20) There may be further equity offerings in the Company which will dilute the shareholding of existing shareholder.**

The Company may require further infusion of funds to satisfy its capital needs and future growth plans, which the Company may not be able to procure. Any future equity offerings by the Company may lead to dilution of equity and may affect the market price of the Equity Shares.

- 21) We have very few permanent employees and we are dependent on contract labour. We are dependent on our Whole Time Directors and key personnel and loss of any of them may adversely affect our business performance.**

Our success depends on the continued services and performance of the members of our Whole Time Directors and key employees. If one or more members of our key personnel were unable or unwilling to continue in their present positions, those persons could be difficult to replace with competent employees and our business could be adversely affected. Moreover, we do not own any key person insurance. As such, any loss of our Whole Time Directors or key employees could adversely affect our business, results of operations and financial condition. Also, we do not have permanent employees for the operations of our Manufacturing unit and entire production is dependent on contract labour. If our contractor is not able to provide sufficient contract labour in time then our production could adversely affect our business, results of operations and financial condition.

- 22) The Registered office is not owned by us.**

The registered office is not owned by us. M/s Sagar Metals (Proprietorship concern of Mr. Asamal S Mehta) has taken this premise on lease and has permitted our company to use the

premises. Even the rent agreement between the owner of the property and M/s. Sagar Metals is not available. If the owner of this leased premise does not renew the agreements under which we occupy the premise on terms and conditions acceptable to us, or at all, or dispute the validity of the lease, we may suffer a disruption in our operations.

23) Our business is dependent on our manufacturing facility. The loss of or shutdown of operations at our manufacturing facility may have a material adverse effect on our business, financial condition and results of operations.

Our manufacturing facility is subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, strikes, lock-outs, continued availability of services of our external contractors, earthquakes and other natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results. Although we take precautions to minimize the risk of any significant operational problems at our facility, our business, financial condition and results of operations may be adversely affected by any disruption of operations at our facility, including due to any of the factors

24) The Company may face significant competition from a number of sources.

The Metal Sector in India is highly competitive with a large number of players. We expect the competition to intensify and increase from a number of sources. We believe that the principal competitive factors in our markets are price, quality and raw material supply. There are many companies in India, which are present across the value chain and hold a commanding position in the industry; such companies pose a threat to our Company.

25) Failure to comply with environmental laws, rules and regulations may adversely affect our business or operations.

A failure on our part to adequately comply with applicable environmental laws, rules and regulations, could hamper or adversely impact the operations of our Company, and consequently, could adversely affect the Company and its cash flows and profitability

26) The Company may continue to be controlled by our promoter group following this issue and our other shareholders may not be able to affect the outcome of shareholder voting.

After the completion of the Issue, our promoters group will collectively hold approximately 73.62% of the outstanding Equity Shares. Consequently, our Promoters Group, if acting jointly, may exercise substantial control over us and *inter alia* may have the power to elect and remove a majority of our Directors and/or determine the outcome of proposals for corporate action requiring approval of our Board of Directors or shareholders, such as lending and investing policies, revenue budgets, capital expenditure, dividend policy and strategic acquisitions/joint ventures.

27) Our insurance coverage may not adequately protect us against all losses. To the extent that we suffer loss or damage which is not covered by insurance or exceeds our insurance coverage, our results of operations and financial performance could be adversely affected.

Our Company has obtained insurance coverage in respect of certain risks. While we believe that the insurance coverage we maintain would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, nor that we have taken out sufficient insurance to cover all material losses. The Company has not taken any insurance for protecting us from future business losses and in the event of such losses occurring, the operations of our Company may be affected significantly. Furthermore, there can be no assurance that we will be able to maintain adequate insurance coverage in the future at acceptable costs. To the extent that we suffer loss or damage for which we do not obtain or maintain insurance or exceeds our insurance coverage, the loss would have to be borne by us and our results of operations and financial performance could be adversely affected.

28) Our Promoters, Directors and Key Managerial Personnel (KMPs) may have interest in our Company, other than reimbursement of expenses incurred or remuneration.

Our Promoters, Directors and KMPs may be deemed to be interested in our Company to the extent of the Equity Shares held by them, or their relatives or our Group Entities, and benefits deriving from their directorship in our Company. Our Promoters, Directors & Key Managerial Personnel are interested in the certain transactions entered into between our Company and themselves as well as between our Company and our Group Entities. For further details, please refer to the chapters titled “**Our Management**” and “**Our Promoters and Promoter Group**”, beginning on page 92 and 104 respectively and the “**Related Party Transactions**” on page 110 of this Draft Prospectus.

29) We have entered into certain transactions with related parties.

The Company has entered into transactions with related parties. There can be no assurance that the Company could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that the Company will enter into related party transactions in the future and there can be no assurance that such transactions will be on terms favourable to us. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on the Company’s financial condition and results of operations. For further information on the transactions with related parties, please refer “Related Party Transactions” on page 110 of this Draft Prospectus.

30) There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

31) After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchange may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company’s results of operations and financial performance;
- Performance of Company’s competitors;
- Adverse media reports on Company or pertaining to the our Industry;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India’s economic and fiscal policies; and
- Significant developments in India’s environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

32) The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by fixed price method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 57 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

33) You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

34) Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

B. EXTERNAL RISK FACTORS BEYOND THE CONTROL OF THE COMPANY

Certain factors beyond the control of the Company could have a negative impact on the Company's performance, such as:

35) Changes in Government Policies and political situation in India could adversely affect our business operations.

Since 1991, the Government of India has pursued policies of economic liberalization, including relaxing restrictions on the private sector. The Company cannot assure you that these liberalization policies will continue in future. Protest against liberalization could slowdown the pace of economic development. The rate of economic liberalization could change, specific laws and policies could change, and foreign investment, currency exchange rates and other matters affecting investing in our securities could change as well.

Any adverse change in Government policies relating to our Industry in general may have an impact on the profitability of the industry.

36) Changes in regulations could adversely affect our business operations.

Changes in regulatory environment relating to Metal Sector in and outside the country will significantly impact the business of the Company.

37) Changes in taxation policies could adversely affect our business operations & results of operations.

Statutory taxes and other levies may affect our margin in the event of our inability to factor such expense in our trading margin. Any increase in taxes and/ or levies, or the imposition of new taxes and/ or levies in the future, may have a material adverse impact on our business, results of operations and financial condition.

38) Terrorist attacks, civil unrests and other acts of violence or war in India and around the world could adversely affect the financial markets, result in a loss of business confidence and adversely affect our business, results of operations, financial condition and cash flows.

Terrorist attacks, civil unrests and other acts of violence or war in India and around the world may adversely affect worldwide financial markets and result in a loss of business confidence and ultimately adversely affect our business, results of operations, financial condition and cash flows. India has, from time to time, experienced instances of civil unrest and political tensions and hostilities in some parts of the country and among neighbouring countries. Such political and social tensions could create a perception that investment in Indian companies involves higher degrees of risk could have a possible adverse effect on the Indian economy, future financial performance and the trading prices of our Equity Shares.

39) We are subject to risks arising from interest rate fluctuations, which could adversely affect our business, financial condition and results of operations.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may adversely impact our results of operations, planned capital expenditures and cash flows.

40) Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

41) The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

42) A slowdown in economic growth in India could cause our businesses to suffer.

Our performance and the growth of our business are necessarily dependent on the health of the overall Indian economy. As a result, a slowdown in the Indian economy could adversely affect our business. India's economy could be adversely affected by a general rise in interest rates, inflation, natural calamities, increases in commodity prices, and protectionist efforts in other countries or various other factors. In addition, the Indian economy is in a state of transition. It is difficult to gauge the impact of these fundamental economic changes on our business. Any slowdown in the Indian economy or future volatility in global commodity prices could adversely affect our business.

43) Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

44) Trading of Equity Shares will be permitted only in Dematerialized form and shareholders holding Equity Shares in physical form will not be able to trade in such Equity Shares.

Since the Equity Shares of the Company are required to be traded compulsory in demat form, shareholders who hold shares in Physical Form may not be able to trade in such Equity Shares unless they get their holding dematerialized.

C. PROMINENT NOTES

1. SECTION III - INTRODUCTION

SUMMARY

The Investor should read the following summary with the Risk Factors included on page no 9 and the more detailed information about the Company and the financial statements included in the Draft Prospectus.

Industry Overview

The Company is operating in metal sector comprising mainly copper industry and steel industry.

COPPER SECTOR

What is Copper?

Copper is a malleable and ductile metallic element that is an excellent conductor of heat and electricity as well as being corrosion resistant and antimicrobial. Copper occurs naturally in the Earth's crust in a variety of forms. It can be found in sulfide deposits (as chalcopyrite, bornite, chalcocite, covellite), in carbonate deposits (as azurite and malachite), in silicate deposits (as chrysocolla and diopside) and as pure "native" copper.

Copper and copper based alloys are used in a variety of applications that are necessary for a reasonable standard of living. Its continued production and use is essential for society's development.

Copper is one of the most recycled of all metals. It is our ability to recycle metals over and over again that makes them a material of choice. Recycled copper (also known as secondary copper) cannot be distinguished from primary copper (copper originating from ores), once reprocessed. Recycling copper extends the efficiency of use of the metal, results in energy savings and contributes to ensuring that we have a sustainable source of metal for future generations.

Copper is an important contributor to the national economies of mature, newly developed and developing countries. Mining, processing, recycling and the transformation of metal into a multitude of products creates jobs and generates wealth. These activities contribute to building and maintaining a country's infrastructure, and create trade and investment opportunities. Copper will continue to contribute to society's development well into the future

Alloyed with other metals, such as zinc (to form brass), aluminum or tin (to form bronzes), or nickel, for example, it can acquire new characteristics for use in highly specialized applications. In fact, society's infrastructure is based, in part, on copper.

INDIAN SCENERIO

The history of Indian copper industry goes back to 1967 with the incorporation of Hindustan Copper Ltd (HCL) and thereafter acquisition of mines from the public sector National Minerals Development Corporation (NMDC). But, the real twist in copper story took with the opening up this sector for private sector players in 1992 which saw the involvement of Indo Gulf Corporation (now a part of Hindalco Industries) and Sterlite Industries into copper smelting and refining through concentrate imports from various mining-rich countries. **(Source: metalworld.co.in/feature1-0208.pdf)**

At present, the demand for copper minerals in the Country for primary copper production is met through two sources i.e. Copper ore mined from indigenous mines and imported concentrates. The indigenous mining activity among the primary copper producers is limited to only Hindustan Copper Limited (HCL). The other primary copper producers in the private sector import the required mineral in the form of concentrate.

Currently, three major players dominate the Indian Copper Industry. Hindustan Copper Limited (HCL) in Public Sector, M/s Hindalco Industries and M/s Sterlite Industries in Private Sector. HCL is the only vertically integrated copper producer in the country, while M/s Hindalco Industries at Dahej in Gujarat and M/s Sterlite Industries in Tuticorin in Tamil Nadu have setup port based smelting and refining

plants. Production of copper cathode by major players in copper industry for the year 2013-14 was 6,44,280 tonnes and during 2014-15 (up to December 2014) are given at Table below

PRODUCTION OF COPPER IN INDIA

(in tones)

Commodity	Number of Factories	Installed Capacity	Production in 2013-14	Production in 2014-15 (upto Dec 2014)
Cathode HCL	2	49,500	17,005	10,938
Sterlite Industries Ltd.	1	4,00,000	2,94,433	2,65,565
Hindalco India Ltd (Unit : Birla Copper)	1	5,00,000	3,32,842	2,87,296
Total		9,49,500	6,44,280	5,63,799

FUTURE OUTLOOK

With the liberalised policies of the Government, the Indian Copper Sector registered a quantum rise in production. The present installed capacity of refined copper has reached at around ten lakh tonnes per year. India's position has shifted from being a net importer of copper to a net exporter. The main demand for refined copper is in the electrical and electronic sectors, construction sector, consumer durables and transport sector. The potential upcoming areas which are likely to boost the internal demand for copper are infrastructure development and railways, power sector, especially rural electrification and information technology sector. At the same time there are potential export markets for refined copper in the Middle-East and South East Asian countries which could be further explored. However, growth in the copper sector is heavily dependent on demand in China.

As per the market survey carried out by Indian Bureau of Mines, the demand of copper by 2016-17 is estimated at one million tonnes based on sectorial growth of copper consumption.

STEEL SECTOR

INDUSTRY STRUCTURE

Steel is an iron based mixture containing two or more metallic and/or non metallic elements usually dissolving into each other when melted. Since it is an iron based alloy—as per its end user requirements—other than iron it may contain one or more other elements such as carbon, manganese, silicon, nickel, lead, copper, chromium, etc. For example, stainless steel (a type of steel) mainly contains chromium that is normally more than 10.5 percent with/without nickel or other alloying elements. Steel is produced using Steel Melting Shop that includes converter, open earth furnace, electric arc furnace and electric induction furnace.

Broadly there are two types of steel according to its composition: alloy steel and non-alloy steel. Alloying steel is produced using alloying elements like manganese, silicon, nickel, chromium, etc. Non-alloy steel has no alloying component in it except that are normally present such as carbon. Non-alloy steel is mainly of three types viz. mild steel (contains upto 0.3% carbon), medium steel (contains between 0.3-0.6% carbons) and high steel (contains more than 0.6% carbon). All types of steel other than mild steel are called special steel. It is mainly because a special care is taken in order to maintain particular level of chemical composition in such steel. This process gives different properties to the steel according to its composition. In India, non-alloying steel constitutes about 95 percent of total finished steel production, and mild steel has large share in it.

According to shape/size/form steel is categorized into different types such as liquid steel, ingots, semis (semi-finished steel) and finished steel. Liquid steel is a first product that comes out from Steel Melting Shop. Liquid steel further goes into ingots, and then ingots advance to semis. Semis are called semi-finished steel products because they are further subject to forging/rolling in order to produce finish steel products such as flat steel products and long steel products. Crude steel generally includes ingots and semis. According to end use, steel is categorized into structural steels, construction steel, deep drawing Steel, forging quality, rail steel, etc.

THE GROWTH PROFILE

The liberalization of Industrial policy and other initiatives taken by the Government have given a definite impetus for entry, participation and growth of the private sector in the steel industry. While the existing units are being modernized / expanded, a large number of new steel plants have also come up in different parts of the country based on the modern, cost effective, state of the art technologies. In the last few years, the rapid and stable growth of the demand side has also prompted domestic entrepreneurs to set up fresh greenfield projects in different states of the country.

Crude steel capacity was 109.85 mt in 2014-15 and India, which emerged as the 3rd largest producer of crude steel in the world in 2015 as per ranking released by the WSA, has to credit, the capability to produce a variety of grades and that too, of international quality standards.

The country is expected to become the 2nd largest producer of crude steel in the world soon, provided all requirements for creation of fresh capacity are adequately met

DETAILS OF THE MARKET MAKING ARRANGEMENT

Our Company and the Lead Manager have entered into a tripartite agreement dated [●] with the following Market Maker, duly registered with SME segment of NSE to fulfil the obligations of Market Making:

Innovate Securities Pvt Ltd (ISPL)

1st Floor, Devashish, 39, Sardar Patel Nagar,
 Nr. Nest Hotel, Navrangpura, Ahmedabad - 380009
 Tel: +91-79-26561106, 26421314, 26421315
 Fax: +91-79-26423759
 Email: innovatescrap@gmail.com
 Contact Person: Mr. Amar M. Parikkh
 SEBI Reg. No. INB 230700236
 Market Maker Reg. No. (SME Segment of NSE): INB 230700236

ISPL, registered with SME segment of NSE will act as the Market Maker and has agreed to receive or deliver the specified securities in the market making process for a period of three years from the date of listing of our Equity Shares or for a period as may be notified by amendment to SEBI (ICDR) Regulations.

The Market Maker shall fulfil the applicable obligations and conditions as specified in the SEBI (ICDR) Regulations, as amended and the circulars issued by NSE and SEBI in this matter from time to time.

Following is a summary of the key details pertaining to the Market Making arrangement:

1. The Market Maker shall be required to provide a 2-way quote for 75% of the time in a day. The same shall be monitored by NSE. Further, the Market Maker shall inform the NSE in advance for each and every black out period when the quotes are not being offered by the Market Maker.
2. The minimum depth of the quote shall be Rs. 1,00,000. However, the investors with holdings less than Rs. 1,00,000 shall be allowed to offer their holding to the Market Maker in that scrip provided that he sells his entire holding in that scrip in one lot along with a declaration to the effect to the selling broker. Based on the IPO price of Rs. 20, the minimum lot size is 5,000 Equity Shares thus minimum depth of the quote shall be Rs. 1,00,000 until the same would be revised by NSE.
3. Execution of the order at the quoted price and quantity must be guaranteed by the Market Maker for the quotes given by him.
4. After a period of three (3) months from the market making period, the Market Maker would be exempted to provide buy quote if the shares of Market Maker in our Company reaches to 25% of Issue Size (including the 5% issue size out to be allotted under this Issue). Any Equity Shares allotted to Market Maker under this Issue over and above 5% of issue size would not be taken into consideration of computing the threshold of 25% of Issue Size. Apart from the above mandatory inventory, only those shares which have been acquired on the platform of the exchange during market making process shall be counted towards the Market Maker's threshold. As soon as the Equity Shares of the Market Maker in our Company reduce to 24% of Issue Size, Market Maker will resume providing 2-way quotes.
5. There shall be no exemption/threshold on downside. However, in the event the Market Maker exhausts his inventory through market making process, NSE may intimate the same to SEBI after due verification.
6. There would not be more than five Market Makers for a script at any point of time and the Market Makers may compete with other Market Makers for better quotes to the investors. At this stage, ISPL is acting as the sole Market Maker.
7. On the first day of the listing, there will be pre-opening session (call auction) and there after the trading will happen as per the equity market hours. The circuits will apply from the first day of the listing on the discovered price during the pre-open call auction.
8. The Market Maker may also be present in the opening call auction, but there is no obligation on him to do so.
9. There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Stock Exchange, while force-majeure will be applicable for non-controllable reasons. The decision of the Stock Exchange for deciding controllable and non-controllable reasons would be final.
10. The Market Maker shall have the right to terminate said arrangement by giving a three months' notice or on mutually acceptable terms to the Merchant Banker, who shall then be responsible to appoint a replacement Market Maker.
In case of termination of the above mentioned Market Making Agreement prior to the completion of the compulsory Market Making period, it shall be the responsibility of the Lead Manager to arrange for another Market Maker in replacement during the term of the notice period being served by the Market Maker but prior to the date of releasing the existing Market Maker from its duties in order to ensure compliance with the requirements of regulation 106V of the SEBI ICDR Regulations. Further our Company and the Lead Manager reserve the right to appoint another Market Maker(s) either as a replacement of the current Market Maker or as an additional Market Maker subject to the total number of Market Makers does not exceed five or as specified by the relevant laws and regulations applicable at that particular point of time. The Market Making Agreement is available for inspection at our registered office from 11.00 a.m. to 5.00 p.m. on working days.
11. NSE SME Exchange will have all margins which are applicable on the NSE Main Board viz. Mark-to-Market, Value-At-Risk (VAR) Margin, Extreme Loss Margin, Special Margins and Base Minimum Capital etc. NSE can impose any other margins as deemed necessary from time-to-time.

(i) Computation of capital gains

- Capital assets are to be categorized into short - term capital assets and long - term capital assets based on the period of holding. All capital assets, being shares held in a Company or any other security listed in a recognized stock exchange in India or unit of the Unit Trust of India or a unit of a mutual fund specified under section 10(23D) of the Act or a zero coupon bond, held by an assessee for more than twelve months are considered to be long - term capital assets, capital gains arising from the transfer of which are termed as LTCG. In respect of any other capital assets, the holding period should exceed thirty – six months to be considered as long - term capital assets.
- STCG means capital gains arising from the transfer of capital asset being a share held in a Company or any other security listed in a recognized stock exchange in India or unit of the Unit Trust of India or a unit of a mutual fund specified under clause (23D) of Section 10 or a zero coupon bonds, held by an assessee for twelve months or less.

The resultant gains thereafter need to be reconverted into Indian currency. The conversion needs to be at the prescribed rates prevailing on dates stipulated. Further, the benefit of indexation as provided in second proviso to Section 48 is not available to non-resident shareholders.
- As per provisions of Section 112 of the Act, LTCG not exempt under Section 10(38) of the Act are subject to tax at the rate of 20% with indexation benefits. However, if such tax payable on transfer of listed securities or units or zero coupon bonds exceed 10% of the LTCG (without indexation benefit), the excess tax shall be ignored for the purpose of computing the tax payable by the assessee. As per provisions of Section 111A of the Act, STCG arising on sale of equity shares or units of equity oriented mutual fund (as defined which has been set up under a scheme of a mutual fund specified under Section 10(23D)), are subject to tax at the rate of 15% provided the transaction is chargeable to STT. No deduction under Chapter VIA is allowed from such income.

The Company is operating in metal sector comprising mainly copper industry and steel industry.

COPPER SECTOR

What is Copper?

Copper is a malleable and ductile metallic element that is an excellent conductor of heat and electricity as well as being corrosion resistant and antimicrobial. Copper occurs naturally in the Earth's crust in a variety of forms. It can be found in sulfide deposits (as chalcopyrite, bornite, chalcocite, covellite), in carbonate deposits (as azurite and malachite), in silicate deposits (as chrysocolla and diopside) and as pure "native" copper.

Copper and copper based alloys are used in a variety of applications that are necessary for a reasonable standard of living. Its continued production and use is essential for society's development.

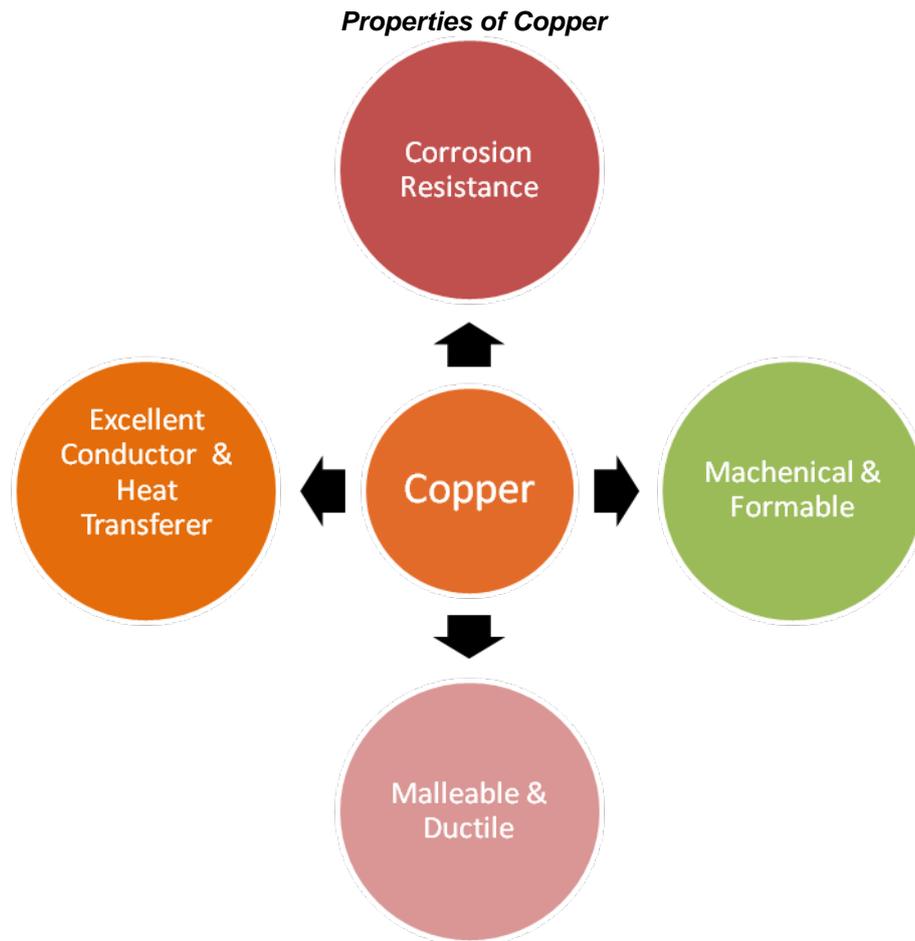

Copper is one of the most recycled of all metals. It is our ability to recycle metals over and over again that makes them a material of choice. Recycled copper (also known as secondary copper) cannot be distinguished from primary copper (copper originating from ores), once reprocessed. Recycling copper extends the efficiency of use of the metal, results in energy savings and contributes to ensuring that we have a sustainable source of metal for future generations.

Copper is an important contributor to the national economies of mature, newly developed and developing countries. Mining, processing, recycling and the transformation of metal into a multitude of products creates jobs and generates wealth. These activities contribute to building and maintaining a country's infrastructure, and create trade and investment opportunities. Copper will continue to contribute to society's development well into the future

Alloyed with other metals, such as zinc (to form brass), aluminum or tin (to form bronzes), or nickel, for example, it can acquire new characteristics for use in highly specialized applications. In fact, society's infrastructure is based, in part, on copper.

But copper's benefits extend beyond mechanical characteristics:

- Copper is **essential to the health** of plants, animal and humans. Deficiencies, as well as excesses, can be detrimental to health.
- **Antimicrobial Properties.**- Due to copper's antimicrobial properties, copper and copper alloy products can be used to eliminate pathogens and reduce the spread of diseases.
- **Recycling.** Copper is one of the most recycled of all metals. Virtually all products made from copper can be recycled and recycled copper loses none of its chemical or physical properties.
- **Energy Efficiency.** Copper can improve the efficiency of energy production and distribution systems.

COPPER RESERVES & RESOURCES

Typically, the future availability of minerals is based on the concept of reserves and resources. Reserves are deposits that have been discovered, evaluated and assessed to be economically profitable to mine. Resources are far bigger and include reserves, discovered deposits that are potentially profitable, and undiscovered deposits that are predicted based on preliminary geological surveys. According to the United States Geological Survey (USGS), copper reserves currently amount to 700 million tons (MT) and identified and undiscovered copper resources are estimated to be around 2,100 MT and 3,500 MT, respectively. The latter does not take into account the vast amounts of copper found in deep sea nodules and land based and submarine massive sulphides. Current and future exploration opportunities will lead to increases in both reserves and known resources.

In 2013 the U.S. Geological Survey (USGS) completed a geology based, cooperative international assessment of copper resources of the world. The USGS assessed undiscovered copper in two deposit types that account for about 80% of the world's copper supply. Porphyry copper deposits account for about 60% of the world's copper. In porphyry copper deposits, copper ore minerals are disseminated in igneous intrusions. Sediment hosted stratabound copper deposits, in which copper is concentrated in

layers in sedimentary rocks, account for about 20% of the world's identified copper. The mean undiscovered totals for porphyry and sediment hosted deposits are 3,100 and 400 MT respectively, resulting in a global total of 3,500 MT of copper. With identified copper resources currently estimated at 2,100 MT, total copper resources (undiscovered + identified) are estimated at 5,600 Mt.

In the period 2004-2014, 178 million tonnes of copper have been mined. In that same period however, reserves have grown by 230 million tonnes. This reflects additional exploration, technological advances and the evolving economics of mining.

In addition copper recycling plays an important role in copper availability since today's primary copper is tomorrow's recycled material. Unlike other commodities such as energy or food, copper is not "consumed". Copper is one of the few raw materials which can be recycled repeatedly without any loss of performance, and key stakeholders such as policymakers, scrap collectors, copper producers and recyclers must all focus on ensuring that yesterday's metal is recycled and re-used. While this will ensure a progressive move towards a more sustainable economy, the loop cannot be completely closed for two reasons. Firstly, demand will continue to increase due to population growth, product innovation and economic development. Secondly in most applications, copper stays in use for decades. Consequently, meeting future metals demand will continue to require a combination of primary raw materials, coming from mines, as well as recycled materials, while innovative policies and technology should continue to contribute to improvements in recycling performance and resource efficiency.

Based on the latest knowledge on geological availability and continuous industry innovation there are good reasons to believe that copper will continue to be a vital and positive contributor to society well into the future.

HOW COPPER IS PRODUCED?

Primary copper production starts with the extraction of copper-bearing ores. There are three basic ways of copper mining: surface, underground mining and leaching. Open-pit mining is the predominant mining method in the world.

After the ore has been mined, it is crushed and ground followed by a concentration by flotation. The obtained copper concentrates typically contain around 30% of copper, but grades can range from 20 to 40 per cent. In the following smelting process, sometimes preceded by a roasting step, copper is transformed into a "matte" containing 50-70% copper. The molten matte is processed in a converter resulting in a so-called blister copper of 98.5-99.5% copper content. In the next step, the blister copper is fire refined in the traditional process route, or, increasingly, re-melted and cast into anodes for electro-refining.

The output of electro-refining is refined copper cathodes, assaying over 99.99% of copper. Alternatively, in the hydrometallurgical route, copper is extracted from mainly low grade oxide ores and also some sulphide ores, through leaching (solvent extraction) and electrowinning (SX-EW process). The output is the same as through the electro-refining route-refined copper cathodes.

There is another important source of raw material which is scrap. Copper scrap derives from either metals discarded in semis fabrication or finished product manufacturing processes ("new scrap") or obsolete end-of life products ("old scrap"). Refined copper production attributable to recycled scrap feed is classified as "secondary copper production". Secondary producers use processes similar to those employed for primary production.

Copper is one of the most recycled of all metals. It is our ability to recycle metals over and over again that makes them a material of choice. Recycled copper (also known as secondary copper) cannot be distinguished from primary copper (copper originating from ores), once reprocessed. Recycling copper extends the efficiency of use of the metal, results in energy savings and contributes to ensuring that we have a sustainable source of metal for future generations

How is Copper Used ?

Copper is shipped to fabricators mainly as cathode, wire rod, billet, cake (slab) or ingot. Through extrusion, drawing, rolling, forging, melting, electrolysis or atomization, fabricators form wire, rod, tube, sheet, plate, strip, castings, powder and other shapes. The fabricators of these shapes are called the first users of copper. The total use of copper includes copper scrap that is directly melted by the first users of copper to produce copper semis.

Copper and copper alloy semis can be further transformed by downstream industries for use in end use products such as automobiles, appliances, electronics, and a whole range of other copper-dependent products in order to meet society's needs. This section provides a range of information about refined copper usage, total use, major uses of copper and end-use.

MAJOR USES

- Electrical**
 Copper is the best non-precious metal conductor of electricity as it encounters much less resistance compared with other commonly used metals. Copper is also used in power cables either insulated or uninsulated, for high, medium and low voltage applications.
- Electronics and Communications**
 Copper plays a key role in worldwide information and communications technologies. HDSL (High Digital Subscriber Line) and ADSL (Asymmetrical Digital Subscriber Line) technology allows for high-speed data transmission, including internet service, through the existing copper infrastructure of ordinary telephone wire. Copper and copper alloy products are used in domestic subscriber lines, wide and local area networks, mobile phones and personal computers.
- Construction**
 Copper and brass are the materials of choice for plumbing, taps, valves and fittings. Thanks in part to its aesthetic appeal, copper and its alloys, such as architectural bronze, is used in a variety of settings to build facades, canopies, doors and window frames.
- Transportation**
 Copper-Nickel alloys are used on the hulls of boats and ships to reduce marine biofouling, thereby reducing drag and improving fuel consumption. Automobiles and trucks rely on copper motors, wiring, radiators, connectors, brakes and bearings. Today, the average mid-size automobile contains about 22.5 kg (50 lbs) of copper, while luxury cars on average contain around 1,500 copper wires totaling about 1.6 km (1 mile) in length.
- Industrial Machinery and Equipment**
 Wherever industrial machinery and equipment is found, it is a safe bet that copper and its alloys are present. Due to their durability, machinability and ability to be cast with high precision and tolerances, copper alloys are ideal for making products such as gears, bearings and turbine blades.

INDIAN SCENERIO

The history of Indian copper industry goes back to 1967 with the incorporation of Hindustan Copper Ltd (HCL) and thereafter acquisition of mines from the public sector National Minerals Development Corporation (NMDC). But, the real twist in copper story took with the opening up this sector for private sector players in 1992 which saw the involvement of Indo Gulf Corporation (now a part of Hindalco Industries) and Sterlite Industries into copper smelting and refining through concentrate imports from various mining-rich countries. **(Source: metalworld.co.in/feature1-0208.pdf)**

At present, the demand for copper minerals in the Country for primary copper production is met through two sources i.e. Copper ore mined from indigenous mines and imported concentrates. The indigenous

mining activity among the primary copper producers is limited to only Hindustan Copper Limited (HCL). The other primary copper producers in the private sector import the required mineral in the form of concentrate.

Currently, three major players dominate the Indian Copper Industry. Hindustan Copper Limited (HCL) in Public Sector, M/s Hindalco Industries and M/s Sterlite Industries in Private Sector. HCL is the only vertically integrated copper producer in the country, while M/s Hindalco Industries at Dahej in Gujarat and M/s Sterlite Industries in Tuticorn in Tamil Nadu have setup port based smelting and refining plants. Production of copper cathode by major players in copper industry for the year 2013-14 was 6,44,280 tonnes and during 2014-15 (up to December 2014) are given at Table below

RESERVES & RESOURCES

India has very limited known reserves of copper ore exploitable for copper production. The total resources of copper ore as on 1st April, 2010 as per UNFC system are estimated at 1.56 billion tonnes. Of these, 394.37million tonnes (25.30%) fall under 'reserves' (proved and probable) categories while the balance 1164 million tonnes (74.69%) are 'remaining resources' category.

India is not self-sufficient in the production of copper ore. In addition to domestic production of ore and concentrates, India imports copper concentrates for its smelters. The domestic demand of copper and its alloys is met through domestic production, recycling of scrap and by imports.

(Source: Indian Minerals Year Book 2014 by Indian Bureau of Mines)

India's share of world reserve & resource is 1.9% only. Total known reserves and resource of copper (in metal terms) are estimated to be around 630 million metric tonnes. HCL hold more than two-thirds of the copper ore reserves in India, with an average of 1.05% copper content.

(Source: Annual Report of Ministry of Mines & Minerals)

Largest resources of copper ore to a tune of 777.17million tonnes (49.86%) are in the state of Rajasthan followed by Madhya Pradesh with 377.19 million tonnes (24.2%) and Jharkhand with 288.12 million tonnes (18.48%). Copper resources in Andhra Pradesh, Gujarat, Haryana, Karnataka, Maharashtra, Meghalaya, Nagaland, Odisha, Sikkim, Tamil Nadu, Uttarakhand and West Bengal accounted for remaining 7.46% of the total all India resources.

Uses

The per capita consumption of copper in India is currently at 0.5 kg which is very low in comparison to Russia 3.3 kg, China 5.4 kg, USA 5.5 kg, Italy 8.9 kg, and Germany 13.6 kg and to that of 10 kg of developed nations. India's per capita consumption is likely to be moderate and has many strides to cover so as to match that of China.

- Electrical/Electronic Industry is by far the largest consumer of copper, where it is used in the form of cables, winding wires as it is the best non-precious metal conductor of electricity as it encounters much less resistance and is safe for electrical distribution system from high voltage transmission cables to micro-circuits. Copper also has relatively high creep strength as compared to other commonly used materials. In Electronic Industry, semi-conductor manufacturers have launched a revolutionary 'copper chip'. By using copper for circuitry in silicon chips, microprocessors are able to operate at higher speeds, using less energy. Copper heat sinks help remove heat from transistors and enable computer processors operate at peak efficiency.
- Copper is used in construction industry as plumbing, taps, valves and fittings components.
- In transportation industry copper is used in various components. According to an estimate by ICSG most cars contain an average of 20 kg copper and luxury & hybrid vehicles contain about 45 kg copper.
- Copper is extensively used in industrial machinery and equipment. It is used in a number of consumer products, such as, coinage, utensils, fixtures, etc. Large quantities of copper are consumed in making copper-based alloys, such as, brass and bronze.

FOREIGN TRADE

➤ EXPORTS

The export of copper from India is in various forms, such as, copper ore & concentrates, refined copper, copper & alloys, brass & bronzes, scrap, cement copper, mattes and powder & flakes. Export of copper ores and concentrates drastically increased to 38,912 tonnes in 2013-14 as against 30 tonnes in 2012-13. Exports were mainly to Oman (37%), Japan (36%) and Indonesia (28%). Export of refined copper slightly decreased to 2,56,230 tonnes in 2013-14 from 2,63,299 tonnes in 2012-13. Export of copper and alloys (including brass & bronze) was at 3,33,082 tonnes in 2013-14 as against 3,31,478 tonnes in 2012-13. Out of the total exports of copper & alloys in 2013-14, which were 291,593 tonnes, brass & bronze constituted 36,064 tonnes, copper (scrap) 4,274 tonnes. China was the single largest importer of refined copper from India with a share of 86%.

➤ IMPORTS

The imports of copper in the country are in the form of copper ore and concentrates, refined copper, copper & alloys, brass & bronzes, scrap, cement, copper, mattes, blister, worked (bars, rods & plates), etc. During the year 2013-14, imports of copper ores and concentrates slightly decreased at 2.05 million tonnes as compared to 2.30 million tonnes in 2012-13. Chile with a share of 35.2% was the leading supplier followed by Australia (22%), Indonesia (10%) and Brazil (6%). Imports of refined copper increased considerably in 2013-14 at 37,505 tonnes as against 23,976 tonnes in 2012-13. Zambia with 50% share was the major supplier followed by Congo (20%), China & UAE (5% each) and Congo Dem Rep (4%). Out of total imports in 2013-14, copper & alloys comprised 2,45,712 tonnes, copper (Scrap) 56,205 tonnes, brass & bronze 22,203 tonnes and brass & bronze (scrap) 87,529 tonnes.

FUTURE OUTLOOK

With the liberalised policies of the Government, the Indian Copper Sector registered a quantum rise in production. The present installed capacity of refined copper has reached at around ten lakh tonnes per year. India's position has shifted from being a net importer of copper to a net exporter. The main demand for refined copper is in the electrical and electronic sectors, construction sector, consumer durables and

transport sector. The potential upcoming areas which are likely to boost the internal demand for copper are infrastructure development and railways, power sector, especially rural electrification and information technology sector. At the same time there are potential export markets for refined copper in the Middle-East and South East Asian countries which could be further explored. However, growth in the copper sector is heavily dependent on demand in China.

As per the market survey carried out by Indian Bureau of Mines, the demand of copper by 2016-17 is estimated at one million tonnes based on sectorial growth of copper consumption.

(Source: Indian Minerals Year Book 2014 by Indian Bureau of Mines)

Analysts have indicated that India's copper consumption is likely to overtake that of Japan by 2015 and that of Germany by 2018. India is likely to be the third largest copper market in 2020 with a market size of 1.75 million tonne and the second largest copper market in the year 2025 with a market size of 2.75 million tonne, as per these projections.

STEEL SECTOR

INDUSTRY STRUCTURE

Steel is an iron based mixture containing two or more metallic and/or non metallic elements usually dissolving into each other when melted. Since it is an iron based alloy—as per its end user requirements—other than iron it may contain one or more other elements such as carbon, manganese, silicon, nickel, lead, copper, chromium, etc. For example, stainless steel (a type of steel) mainly contains chromium that is normally more than 10.5 percent with/without nickel or other alloying elements. Steel is produced using Steel Melting Shop that includes converter, open earth furnace, electric arc furnace and electric induction furnace.

Broadly there are two types of steel according to its composition: alloy steel and non-alloy steel. Alloying steel is produced using alloying elements like manganese, silicon, nickel, chromium, etc. Non-alloy steel has no alloying component in it except that are normally present such as carbon. Non-alloy steel is mainly of three types viz. mild steel (contains upto 0.3% carbon), medium steel (contains between 0.3-0.6% carbons) and high steel (contains more than 0.6% carbon). All types of steel other than mild steel are called special steel. It is mainly because a special care is taken in order to maintain particular level of chemical composition in such steel. This process gives different properties to the steel according to its composition. In India, non-alloying steel constitutes about 95 percent of total finished steel production, and mild steel has large share in it.

According to shape/size/form steel is categorized into different types such as liquid steel, ingots, semis (semi-finished steel) and finished steel. Liquid steel is a first product that comes out from Steel Melting Shop. Liquid steel further goes into ingots, and then ingots advance to semis. Semis are called semi-finished steel products because they are further subject to forging/rolling in order to produce finish steel products such as flat steel products and long steel products. Crude steel generally includes ingots and semis. According to end use, steel is categorized into structural steels, construction steel, deep drawing Steel, forging quality, rail steel, etc.

GLOBAL SCENARIO

- In 2014, the world crude steel production reached 1665 million tonnes (mt) and showed a growth of 1% over 2013.
- China remained the world's largest crude steel producer in 2014 (823 mt) followed by Japan (110.7 mt), the USA (88.2 mt) and India (86.5 mt) at the 4th position.
- WSA has projected Indian steel demand to grow by 6.2% in 2015 and by 7.3% in 2016 as compared to global steel use growth of 0.5% and 1.4% respectively. Chinese steel use is projected to decline in both these years by 0.5%.
- Per capita finished steel consumption in 2014 is estimated at 217 kg for world and 510 kg for China by WSA.

DOMESTIC SCENARIO

- The Indian steel industry has entered into a new development stage from 2007-08, riding high on the resurgent economy and rising demand for steel.
- Rapid rise in production has resulted in India becoming the 3rd largest producer of crude steel in 2015 and the country continues to be the largest producer of sponge iron or DRI in the world.
- As per the report of the Working Group on Steel for the 12th Five Year Plan, there exist many factors which carry the potential of raising the per capita steel consumption in the country. These include among others, an estimated infrastructure investment of nearly a trillion dollars, a projected growth of manufacturing from current 8% to 11-12%, increase in urban population to 600 million by 2030 from the current level of 400 million, emergence of the rural market for steel currently consuming around 10 kg per annum buoyed by projects like Bharat Nirman, Pradhan Mantri Gram Sadak Yojana, Rajiv Gandhi Awaas Yojana among others.
- At the time of its release, the National Steel Policy 2005 had envisaged steel production to reach 110 million tonnes (mt) by 2019-20. However, based on the assessment of the current ongoing projects, both in greenfield and brownfield, the Working Group on Steel for the 12th Five Year Plan has projected that domestic crude steel capacity in the country is likely to be 140 mt by 2016-17 and has the potential to reach 149 mt if all requirements are adequately met.
- The National Steel Policy 2005 is currently being reviewed keeping in mind the rapid developments in the domestic steel industry (both on the supply and demand sides) as well as the stable growth of the Indian economy since the release of the Policy in 2005.

THE GROWTH PROFILE

The liberalization of Industrial policy and other initiatives taken by the Government have given a definite impetus for entry, participation and growth of the private sector in the steel industry. While the existing units are being modernized / expanded, a large number of new steel plants have also come up in different parts of the country based on the modern, cost effective, state of the art technologies. In the last few years, the rapid and stable growth of the demand side has also prompted domestic entrepreneurs to set up fresh greenfield projects in different states of the country.

Crude steel capacity was 109.85 mt in 2014-15 and India, which emerged as the 3rd largest producer of crude steel in the world in 2015 as per ranking released by the WSA, has to credit, the capability to produce a variety of grades and that too, of international quality standards.

The country is expected to become the 2nd largest producer of crude steel in the world soon, provided all requirements for creation of fresh capacity are adequately met

In addition, Company had started its plant at Lunej, Khambhat in July, 2014 in a premise which was taken on rent. Initially, the promoters of the company were intending to purchase the whole plant including land & building but there was problem in the clearance of title deed. Therefore, the company entered into a rent agreement with the seller for using the said premise for a period of 11 months and to acquire the plant later on when the title is cleared in the name of the seller. The company invested approximately Rs. 3.00 Crores in plant & machineries for commencing its business activities. As the seller could not clear property title in his name even after completion of a year and it was apparent that seller was delaying the sale process unnecessarily, Company decided to leave the project and shut down plant. PLANT & MACHINERY

The Company is not proposing to utilize the issue proceeds for acquiring plant and machineries.

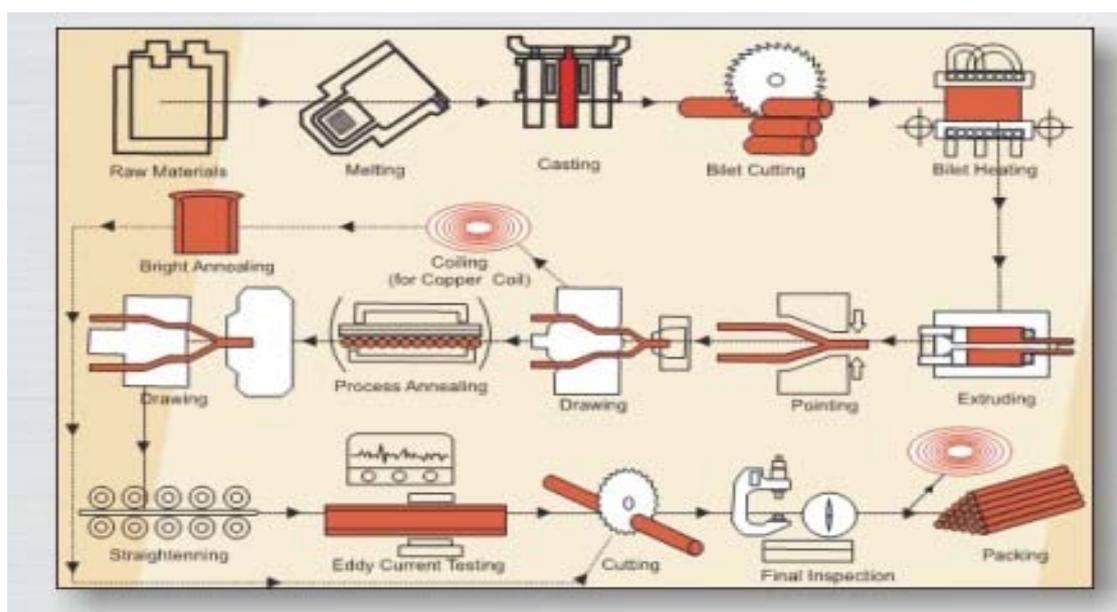

TECHNOLOGY

The Company is using indigenous technology available in the Industry. The choice of the technology was based on the merits and demerits of various technologies, the status of technology, flexibility of operation, availability of raw materials, capital investment and economics of operations.

MANUFACTURING PROCESS FLOW CHART

The existing detailed manufacturing process for the Copper plant is given below.

Production process starts from the scrap melting in the induction furnace. Detailed stage-wise process descriptions as follows,

Copper Melting Shop (Billets/Ingot Production)

1. Raw Materials

The main raw material of our company is Copper wire bar / scrap cathode. Cathode or Copper scrap is used in the furnace but the melting loss is higher in the case of scrap. The melting loss is approximately 8% in case of copper scrap and 2% in case of cathode. The Copper scrap is available in India and also may be imported from China, Vietnam, Singapore, Dubai etc.

2. Melting of Scrap (Induction Furnace)

The Copper scrap is sorted according to weight and properties at factory. Thereafter a sample for purity analysis in chemical laboratory in the factory premises is taken. The Chemical Laboratory is equipped with latest equipments for testing of purity of raw material. Once the sample is approved the scrap is transferred to bailing department which makes it easier to pour in melting furnace.

The bailing process reduces process loss substantially. Each melting furnace has capacity of 700 Kgs per lot. The scrap is melted at a temperature of 1200 degree centigrade. It takes around one and half hour time to melt 700 kgs scrap.

3. Casting

The melted copper is now poured into moulds. The water is circulated into the moulds in order to cool it and convert it into round rods. It takes around 10-15 minutes to form round rod. One sample is drawn from each lot for testing in Company's chemical laboratory, where various copper properties are tested including conductivity. This form of Copper rod is called Ingot.

4. Cutting

These Ingots are now cut into different sizes as per the requirements for further process and called Billets. The pieces are drilled at the centre for extrusion purposes.

5. Billets Heating & Extrusion

These billets are heated in pre heating furnace and heated billets are placed in the container of Extrusion press where heated billets are extruded into mother tubes of sizes as per the customer requirements.

6. Drawing Process

The mother tubes are now re-drawn into smaller gage on draw benches. The thickness is maintained by putting floating plugs in tubes. The drawing process time and number of drawing cycles varies and depends on size of pipe because the tubes having bigger dimensions may require less drawing while smaller dimension tubes require more drawing cycles. After 4-5 draw cycles, intermediate annealing is required to make the tube soft and to make it free from internal residual stresses.

7. Straightening

The tubes are now cut into pieces as per customer's required length and then transferred to Bright Annealing Vacuum Furnace for annealing tubes. The final size and shape to product is given by further drawing processes.

8. Coiling and final Inspection and Testing

The pipes are transferred to straightening process thereafter for coiling and final inspection and testing.

9. Packing and Dispatch

The final product is packed in polyethylene bags and wooden boxes before dispatch to customers.

COLLABORATIONS

No collaboration with any entity for technical and financial assistance has been entered into.

INFRASTRUCTURE FACILITIES FOR RAW MATERIALS AND UTILITIES

Raw Materials

The main raw material of our Company is copper scrap and cathode. The copper scrap and cathode is easily available in the local market. Our Company also has an alternative to import copper scrap.

(a) Scrap

Scrap act as a raw material for production of Copper products through the induction furnace route. This route is good for the moderate sized plants especially where scrap and electricity is easily available. Large scale plants generally opt for the blast furnace method because of economies of scale using in this route. Our company has multiple suppliers for the scrap both domestic as well as international that mitigates the dependency on one supplier.

(b) Ferro Alloys

Ferro Alloys, as the name indicates are the alloys of Nickel, Chromium, Manganese, Silicon etc. Ferro Alloys are used in Copper making as an additive for imparting strength and quality required in a particular grade of Copper. Ferro Manganese, Silicon Manganese & Ferro Silicon are used in the Copper making in different proportion depending upon the grade of the Copper. Ferro Alloys is used for the manufacturing of various grades of Copper. The same is procured from local sources within India and are easily available.

Utilities

Our Company's manufacturing unit is located at Santej, where the utilities like water, power and manpower are easily available.

Power

The Company has been sanctioned a load of 600KVA from Uttar Gujarat Vij Company Ltd which is sufficient for the existing operations of the manufacturing unit. Company is also having one DG set as a standby arrangement to handle the unavailability of power.

Water

Water is being used for our manufacturing facility as well as for general drinking and sanitary purposes. The water consumption at our manufacturing unit is 500 Litres for drinking and 1500 litres for manufacturing purposes. Water requirement at our unit is being met from underground sources through deep tube wells. Water purifier has been installed for obtaining the desired level of quality of water for the manufacturing process as well as for the purpose of drinking.

Fuel

PNG is used for reheating in furnace. PNG is being procured from Sabarmati Gas Limited through pipeline which is available without any quantitative restriction throughout the year.

Manpower

The manufacturing process in our Industry requires an appropriate mix of skilled, semi-skilled and Unskilled labour which is readily available. Most of our requirement is that of semi-skilled and unskilled labours. Company is heavily dependent on contract labour and engages labors on contract basis as and when required. The Company has maintained good relationship with the employees. There is easy availability of labors around the town where our factory is located and we do not foresee any problem in hiring more manpower as and when required. Currently the people employed in the Company are as follows:

Sr. No.	Particulars	Permanent employees	
		Plant	Office
1.	Supervisory & Managerial	1	2
2	Executive	2	2
3	Company Secretary	Nil	1
4	Semi Skilled/Unskilled	Nil	Nil
	TOTAL	3	5

Plant is being operated mainly with the help of contract labours provided by the contractor. Number of contract labour depends on the production schedule which is decided by the management on the basis of orders on hand and proposed demand schedule.

Quality Assurance

The products are checked for other sorts of physical manufacturing defects. For the same intent laboratory with UTM (Universal Testing Machine), Hardness tester, Impact tester, chemical laboratory with Spectro analyzer with advanced technology have been installed within the factory premises.

COMPETITION

With the growing markets, competition is bound to increase. The Company faces competition with other similar players located in the markets to which we cater. The Company is focusing on maintaining the quality of our final product to sustain the competition. The Company believes that we enjoy certain key competitive strengths which will help us to grow in future and will enable us to perform still better in the time to come.

BUSINESS STRATEGY

The Company's strategy is to operate the business in an efficient & effective way so as to supply quality products that satisfy its customer's needs and add value to its stakeholders. The focus of the Company will be to increase the contribution on the products by reducing the cost of production, control over logistics, ensure uninterrupted raw material supply, and command high prices through gradual shifting to value added products and to ensure long term sustainability of the Company.

REGULATIONS AND POLICIES

There are several legislations, which apply to companies engaged in the Metal Sector in India. The Company is subjected to all such laws and regulations.

Under the provisions of various Central Government and State Government Statutes / Legislations, the Company is required to obtain and regularly renew certain licenses / registrations and / or to seek statutory permissions to conduct the business and operations.

The list set out below is by way of an illustration and is not an exhaustive list of all statutes applicable to the Company's operations. In addition to this, the Company is required to comply with various laws including labour laws and the rules framed thereunder.

A summary of the regulations and policies currently applicable are as follows:

National Mineral Policy, 2008

The National Mineral Policy, 2008 (hereinafter referred to as the "Policy") is not a regulation but a policy document which lays down a broad policy framework for India's Mineral Sector and it recommends measures like assured right to the next stage mineral concession, transferability of mineral concessions and transparency in allotment of concessions, in order to reduce delays which are seen as impediments to investment and technology flows in the mining sector in India.

The Policy also seeks to develop a Sustainable Development Work for optimum utilization of the Country's natural mineral resources for the industrial growth in the Country and at the same time improving the life of the people living in the mining areas, which are generally located in the backward and tribal regions of the Country.

The Policy focuses on achieving global competitiveness not only in terms of cost, quality and product mix, but also in terms of global benchmarks of efficiency and productivity.

The Government proposes to create incremental demand for domestic consumption via promotional efforts, awareness drives and strengthening the delivery chain, particularly in rural areas. On the supply side the strategy would be to facilitate creation of additional capacity, remove procedural and policy bottlenecks in the availability of inputs such as iron ore and coal, make higher investments in R&D and HRD and encourage the creation of infrastructure such as roads, railways and ports.

Environment Regulation

The three major statutes in India that seek to regulate and protect the environment against pollution related activities in India are the

- a) Water (Prevention and Control of Pollution) Act 1974,
- b) Air (Prevention and Control of Pollution) Act, 1981 and
- c) Environment Protection Act, 1986.

The basic purpose of these statutes is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards (PCBs), which are vested with diverse powers to deal with water and air pollution, have been set up in each state. The PCBs are responsible for setting the standards for maintenance of clean air and water directing the installation of pollution control devices in industries and undertaking investigations to ensure that industries are functioning in compliance with the standards prescribed. These authorities also have the power of search, seizure and investigation if the authorities are aware if or suspect pollution. All industries and factories are required to obtain consent orders from the PCBs, which are indicative of the fact that the factory or industry in question is functioning in compliance with the pollution control norms laid down. These are required to be renewed annually.

Labour laws

India has stringent labour legislations more in favour of the employees. Some of the labour laws applicable to the Company are:

- Contract Labour (*Regulation and Abolition*) Act, 1970;
- Employees' Provident Funds and Miscellaneous Provisions Act, 1952;

- Payment of Gratuity Act, 1972;
- Payment of Bonus Act, 1965;
- Payment of Wages Act, 1936; and
- Industrial Disputes Act, 1947 and Industrial Disputes (*Central*) Rules, 1957.

Labour laws ensure and regulate the employment terms, minimum compensation, health, safety and welfare of all employees working in an industry or factory. Labour laws also provide for detailed procedures for the resolution of disputes between employers and employees and the termination or severance of the employee. The applicability of labour laws also depends on the number of workers employed in an industrial establishment (working with or without the aid of power) and their monthly remuneration.

Factories Act, 1948

The said Act is applicable to all factories employing 10 or more persons and working with the aid of power or employing 20 persons and working without the aid of power. The Act covers all workers employed in the factory premises or precincts directly or through an agency including a contractor, involved in any manufacture.

According to section 7(1) of the Factories Act, 1948, the occupier shall at least 15 days before he begins to occupy or use any premises as a factory, send to the Chief Inspector, a written notice containing particulars of the factory, its occupier, owner of premises, nature of manufacturing process, number of workers and such other information.

According to section 7A, every occupier is required to ensure, so far as is reasonably practicable, the health, safety and welfare of all workers while they are at work in the factory. Every occupier is required to prepare, and, as often may be appropriate, revise, a written statement of his general policy with respect to the health and safety of the workers at work and the organization and arrangements for the time being in force for carrying out that policy, and to bring the statement and any revision thereof to the notice of all the workers in such manner as may be prescribed.

Excise Regulations

The Central Excise Act, 1944 seeks to impose an excise duty on excisable goods which are produced or manufactured in India. The rate at which such a duty is imposed is contained in the Central Excise Tariff Act, 1985. However, the Indian Government has the power to exempt certain specified goods from excise duty by notification. Customs Regulations

However, the Indian Government has the power to exempt certain specified goods from excise duty by notification. The basic custom duty on imported copper /copper scrap is as per the Government policies as modified from time to time.

Foreign Trade (Development and Regulation) Act, 1992

Under the Foreign Trade (Development and Regulation) Act, 1992, the Indian Government is empowered to periodically formulate the Export Import Policy (the "EXIM Policy") and amend it thereafter whenever it deems fit. All exports and imports must be in compliance with the EXIM Policy. The iron and steel industry has been extended various schemes for the promotion of exports of finished goods and imports of inputs. The major schemes available are the Duty Exemption and Remission Scheme and the Export Promotion of Capital Goods (EPCG) Scheme.

The Duty Exemption Scheme enables duty free imports of inputs required for the production of exports by obtaining an advance license. The Duty Remission Scheme enables post export replenishment/remission of duty on inputs used in the export product. This scheme consists of a Duty Free Replenishment Certificate ("DFRC"), the Duty Drawback Scheme ("DBK") and the Duty Entitlement Pass Book (the "DEPB"). While a DFRC enables duty free replenishment of inputs used for the manufacture of exports,

under the DEPB Scheme, exporters on the basis of notified entitled rates are granted duty credit, which would entitle them to import goods, except capital goods, without duty.

VAT is based on the value addition of goods, and the related VAT liability of the dealer is calculated by deducting input tax credit for tax collected on the sales during a particular period. VAT is a consumption tax applicable to all commercial activities involving the production and distribution of goods and the provisions of services, and each state that has introduced VAT has its own VAT Act, under which, persons liable to pay VAT must register and obtain a registration number from Sales Tax Officer of the respective State.

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer, in consultation with the LMs, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Applications at or above this Offer Price and cut-off Applications are valid Applications and are considered for allocation in the respective categories.

Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding ("**Alternate Book Building Process**").

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/Offer Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Applicant with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Applicant is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Applicants is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Applicant, decide whether a Applicant be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Applicant be allowed single or multiple Applications.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE
